OBJECTIVE

Computer Science undergraduate with a strong foundation in technology and product management. Currently working as a Product Management Intern, gaining hands-on experience in requirement analysis, stakeholder collaboration, and data-driven decision-making. Interested in building scalable, user-centric products at the intersection of technology and business.

CERTIFICATIONS

- IBM Skills Workshop Certification – AI and Data Science
 - GUVI Full-Stack Web Development Certification
 - AWS Academy Graduate – AWS Academy Cloud Architecting
 - AWS Academy Graduate – AWS Academy Cloud Foundations
 - Soft Computing & Machine Learning Workshop Participation Certificate
 - Certified Hedera Developer Program – Hedera Hashgraph
 - Full-Stack Development Internship Certificate – 8Queens Tech Web Development
 - Internship Certificate – VIT-AP University
 - VIT-AP Hackathon Participation Certificate
 - freeCodeCamp – JavaScript Algorithms and Data Structures Certification
 - Coursera – UI/UX Design Certification
-

FUNCTIONAL SKILLS

- Agile Development
 - Project Deployment
 - Version Control (Git)
 - UI/UX Design Principles
 - Cloud Services Integration
 - Cross-disciplinary Innovation
-

TECHNICAL SKILLS

- **Languages:** JavaScript, Java, Python, PHP, HTML5, CSS3, SQL, C
- **Frameworks & Libraries:** React.js, Node.js, Express.js, Bootstrap, Tailwind CSS, jQuery
- **Databases:** MongoDB, MySQL, Cassandra, Redis

- **UI/UX & Design:** Figma, Canva, Responsive Design, Accessibility Standards, Color Theory, Wireframing, Prototyping, User-Centered Design, Parallax Effects, SVG Animation
 - **DevOps & Deployment:** Git, GitHub, Vercel, Netlify, Heroku, GitHub Actions
Tools & APIs: Postman, Chrome DevTools, SVG Icons, LocalStorage, OpenAI API Integration
 - **Backend & Auth:** REST APIs, Prepared Statements (PHP-MySQL), Redis Session Management, JWT-based Authentication
 - **Concepts:** Full-Stack Web Development, Object-Oriented Programming, MVC Architecture, Software Testing, Version Control (Git), Agile Workflow, Database Design, Login/Registration Systems
-

PROJECTS

- Paravyoma – Real-Time CanSat Telemetry System
 - Developed an end-to-end telemetry solution for a CanSat launched via rocket, enabling live transmission of sensor data (GPS, temperature, pressure, motion) from a Teensy-based embedded system to a ground station via XBee RF modules.
 - Built a Python dashboard to visualize real-time flight data and ensure mission safety through live monitoring.
- Gmail Clone Web Application
 - Designed and developed a full Gmail-like webmail system using React.js, Node.js, and MongoDB.
 - Implemented dynamic authentication, inbox management, and a responsive user interface.
- Crime Vision – Intelligent Crime Detection System
 - Built a soft-computing-based system to analyze visual crime patterns using machine learning algorithms.
- ChronoAI – AI-powered Time Management Tool
 - Created an intelligent scheduling platform that uses ML models to recommend optimal time slots.
- Forbidden Temptation – E-commerce Website
 - Developed a parallax-effect-based chocolate brand website with a full shopping cart and checkout features, optimized for mobile responsiveness.
- VITAPMM – Workshop Management System
 - Built a platform for managing university-level mathematics workshops, focusing on user-friendly coordination and scheduling.

- IReadMagma – Physics Event Content Management
 - Developed a web-based content coordination tool to streamline physics event management.
- Student Management System Interface
 - Led the UI design for a university-level project focused on managing internal academic operations.
 - Used Figma for prototyping and transformed designs into functional React components.
- VIT-AP Portal UI Revamp
 - Proposed a complete UI/UX redesign of the VIT-AP student portal, focusing on clarity, accessibility, and visual hierarchy.
 - Designed dashboards, course registration, and timetable modules using Figma.

EXPERIENCE

Product Management Intern
Xtract.io | Current

- Collaborating with teams to support product planning and feature prioritization.
- Assisting in requirement analysis and product documentation.
- Analyzing user feedback and market insights to enhance product value.

Full-Stack Developer Intern
8Queens Tech, Remote | June – July 2023

- Worked in agile teams, participated in production-level coding, debugging, deployment, and live project releases.
- Gained real-world experience managing technical deadlines, client deliverables, and teamwork collaboration.

Research & Development Intern – Software Projects
Digital Fortress (Under Dr. S. Sibi Chakkaravarthy ,Associate Professor)

- Led software modules in research-driven projects like IReadMagma and VITAPMM.
- Applied Git, version control, and live testing protocols for development in academic settings.

EDUCATION

- RMK School, 10th CGPA: 92%
- Sudharsanam Vidyaashram School, 12th CGPA: 87%

- Currently : Bachelor of Technology (B.Tech) in Computer Science Core (final year)
VIT-AP University, Andhra Pradesh, India
2022 – 2026.
 - **Relevant Coursework:** Data Structures, Machine Learning, Web Development, Database Management, Optimization Techniques, Artificial Intelligence, Cyber Security
-

ACHIEVEMENTS

- Developed and deployed several large-scale personal and academic software systems
 - Showcased creative solutions at university-level project expos
 - Recognized for integrating design and functionality in software deliverables
-

EXTRA-CURRICULAR ACTIVITIES

- Anchor and narrator for school and university events.
 - Active contributor to coding clubs and hackathons.
 - Enthusiast in fashion-tech, exploring creativity through tailoring and digital customization
-

LANGUAGES

- English
 - Tamil
 - Telugu
 - Korean (Basic Proficiency)
-
